

# FALL 2016

## INSTRUCTIONAL DESIGN IN COMPUTER SCIENCE

**5:00-6:15pm, Tues/Thurs; CRN: 82534**

This is a graduate level course involving reading, discussion, and application of principled methods of instructional design using the Dick and Carey model. Guest speakers from VT's School of Education will talk about instructional design, motivation and engagement, and assessment. Participants will be engaged in a major self-identified project to apply instructional design to some key component of a course in the CS curriculum.

Computer Science @ Virginia Tech

CS 6604

If you are planning  
an academic  
career...

... believe that  
instruction should  
be designed with  
the same rigor as  
software...

...want to try  
designing a  
course component  
for a real class...

...hear from  
experts in the  
field...
