

CLIFFORD ALAN SHAFFER

(Shortened Vitae, last updated November 14, 2018)

Professor	Home address:
Department of Computer Science	249 Brookside Ln.
Virginia Polytechnic Institute	Newport, VA 24128
and State University	Home Phone: (540) 544-7254
Blacksburg, VA 24061	Email: shaffer@cs.vt.edu
Office Phone: (540) 231-4354	http://www.cs.vt.edu/~shaffer

Date and place of birth: August 15, 1959, Baltimore, Maryland.

Education:

- BS in Computer Science: University of Maryland, College Park, 1980.
- MS in Computer Science: University of Maryland, College Park, 1982.
- PhD in Computer Science: University of Maryland, College Park, 1986.

Dissertation Title: Application of Alternative Quadtree Representations

Advisor: Hanan Samet

Professional positions held:

Professor (9/87 – present) and Associate Department Head for Graduate Studies (7/17 – present)
Department of Computer Science, Virginia Polytechnic Institute & State University.
Interdisciplinary Program in Genetics, Bioinformatics, and Computational Biology, 7/04 – present.

W.S. “Pete” White Chair for Innovation in Engineering Education (6/16 – 6/18)
Department of Computer Science, Virginia Polytechnic Institute & State University.

Major research projects:

2011-present: Principle Investigator for the OpenDSA project to develop a creative-commons, open-source active eTextbook for algorithms and data structures courses. See <http://algoviz.org/OpenDSA>.

2006–present: Principle Investigator for the AlgoViz project to develop a community of users and developers of algorithm visualization in computer science education. This includes development of the AlgoViz Portal (<http://algoviz.org>).

2004–2006: Principal Investigator for an investigation of log surface defect detection methods using high-resolution laser scanning.

2001–present: Co-Principal Investigator for the JigCell project, a problem-solving environment for biochemical pathway analysis. With support from DARPA, NSF, and NIH, this is a major multi-disciplinary project involving faculty from Biology and Computer Science. My major role is as system architect, primarily for developing user interfaces and visualizations for the system, and overseeing general software development and system integration.

1996–1999: Principal Investigator for FIPSE-supported “Integrating Statistics and Models across the Social Sciences Curricula.” This project integrates statistical processing with large databases and tutorials to teach Social Sciences students basic statistics and data visualization.

1990–1996: Project director for Project GeoSim, a series of software modules that apply geographic information systems and simulation to introductory geography education. This software simulates of various geographic and economic processes, such as migration and population dynamics.
